PAWBOUND · ART BRIEF FOR CHATGPT

Pawbound art brief

Art requests for a painterly 3D dog adventure game set on a sunny Texas Hill Country greenbelt. It has a clear creek, pale limestone, live oaks and a pack of dogs.

To ChatGPT: please read this whole brief. Then make **one item at a time**, using the exact prompt for the code I give you (for example, “Do D1”).

- **Style:** match the attached painted reference pictures, with warm afternoon sun, dappled leaf shade, saturated greens and golds, and visible brush strokes. Reference sheets for 3D modeling (D items) are the exception: keep those clean and evenly lit.
- **Images:** PNG. Use the size noted on each item.
- **3D models (P items):** one .glb file per item, real-world scale in meters, base at Y = 0, facing +Z, under 5,000 triangles. Give me a download link.
- If you can’t make something exactly as asked, say what you changed.

Dog reference sheets

For each dog, first make the side view. Then make the front view with the second prompt. Image size: 2048 × 2048.

D1 **Goldendoodle** — Side view

```
Create a clean 3D-modeling reference image of this exact dog: an adult goldendoodle with a curly apricot-red coat and floppy ears. Full body, side view, standing naturally on all four legs, head level, mouth closed, tail relaxed. No collar, no harness, no leash. Plain pure white background, soft even studio lighting, no cast shadows, no motion blur. The whole dog is in frame with empty space around it. Realistic proportions and accurate coat color and texture.
```

D1-F **Goldendoodle, front view** — Then: front view

```
Same dog, same style and lighting, but a straight-on front view, standing, facing the camera.
```

Same side-view prompt for each remaining dog. Only the description changes:

CODE	DOG	DESCRIPTION USED IN THE PROMPT
D2	**Bernedoodle**	an adult bernedoodle with a curly black coat, white chest, white paws and a white blaze on the face

D3	**Siberian Husky**	an adult Siberian husky, black and white, with a curled bushy tail and a white face mask
D4	**Golden Retriever (red)**	an adult golden retriever with a deep red-gold feathered coat
D5	**Golden Retriever (cream)**	an adult cream golden retriever with a light feathered coat
D6	**Black Labrador**	an adult black Labrador retriever with a short shiny coat
D7	**Australian Shepherd**	an adult blue merle Australian Shepherd with copper cheeks, a white chest and one blue eye
D8	**French Bulldog**	an adult fawn French bulldog with a black mask and bat ears
D9	**Shih-tzu mix**	a small adult brown-and-tan shaggy shih-tzu mix with floppy ears

For D2–D9, ask for the side view and then the front view (“-F”), just like D1.

Ground and surface textures

Each texture uses this prompt, with the surface swapped in:

T1 Limestone

Tileable · 2048²

```
Seamless tileable square texture, viewed straight down, of pale cream Texas limestone rock with gray lichen spots, painted in the same loose sunlit painterly style as the attached images. Flat lighting, no shadows from outside objects, no perspective, no horizon, edges must tile seamlessly. Square PNG, 2048 × 2048 pixels.
```

T2 Dirt trail

Tileable · 2048²

```
Seamless tileable square texture, viewed straight down, of a packed tan dirt hiking trail with small pebbles and fallen leaves, painted in the same loose sunlit painterly style as the attached images. Flat lighting, no shadows from outside objects, no perspective, no horizon, edges must tile seamlessly. Square PNG, 2048 × 2048 pixels.
```

T3 Grass

Tileable · 2048²

```
Seamless tileable square texture, viewed straight down, of sunlit green and golden summer grass, painted in the same loose sunlit painterly style as the attached images. Flat lighting, no shadows from outside objects, no perspective, no horizon, edges must tile seamlessly. Square PNG, 2048 × 2048 pixels.
```

T4 Creek pebbles

Tileable · 2048²

```
Seamless tileable square texture, viewed straight down, of smooth creek pebbles in warm tan, gray and ochre, painted in the same loose sunlit painterly style as the attached images. Flat lighting, no shadows from outside objects, no perspective, no horizon, edges must tile seamlessly. Square PNG, 2048 × 2048 pixels.
```

T5 Oak bark

Tileable · 2048²

```
Seamless tileable square texture, viewed straight down, of live oak tree bark, painted in the same loose sunlit painterly style as the attached images. Flat lighting, no shadows from outside objects, no perspective, no horizon, edges must tile seamlessly. Square PNG, 2048 × 2048 pixels.
```

T6 Oak leaves

Tileable · 2048²

```
Seamless tileable square texture, viewed straight down, of clusters of small green and yellow oak leaves on a transparent background, painted in the same loose sunlit painterly style as the attached images. Flat lighting, no shadows from outside objects, no perspective, no horizon, edges must tile seamlessly. Square PNG, 2048 × 2048 pixels.
```

Sky

S1 **Sky panorama** Image · 2:1, 4096 × 2048

```
360-degree equirectangular panorama, 2:1 ratio, of a bright summer sky with soft white clouds above a distant Texas Hill Country tree line. Painted in the same painterly style as the attached images. No foreground objects, no ground below the tree line.
```

3D props

One .glb file each.

P1 **Treasure chest** .glb

```
Create a single .glb 3D model of a wooden treasure chest with gold trim, 1 m wide for a stylized 3D dog adventure game. Real-world scale in meters, base sitting at Y=0, facing +Z, under 5,000 triangles, with simple colored materials. Give me the .glb file to download.
```

P2 **Bone treat** .glb

```
Create a single .glb 3D model of a cartoon dog bone treat, 0.5 m long for a stylized 3D dog adventure game. Real-world scale in meters, base sitting at Y=0, facing +Z, under 5,000 triangles, with simple colored materials. Give me the .glb file to download.
```

P3 **Trailhead sign** .glb

```
Create a single .glb 3D model of a wooden trailhead sign with two posts, 2.6 m wide for a stylized 3D dog adventure game. Real-world scale in meters, base sitting at Y=0, facing +Z, under 5,000 triangles, with simple colored materials. Give me the .glb file to download.
```

P4 **Dog house** .glb

```
Create a single .glb 3D model of a small wooden dog house with a red roof, 3 m wide for a stylized 3D dog adventure game. Real-world scale in meters, base sitting at Y=0, facing +Z, under 5,000 triangles, with simple colored materials. Give me the .glb file to download.
```

P5 **Rift Gate** .glb

```
Create a single .glb 3D model of a large rusted steel ring archway, 7 m tall, like a park trail entrance for a stylized 3D dog adventure game. Real-world scale in meters, base sitting at Y=0, facing +Z, under 5,000 triangles, with simple colored materials. Give me the .glb file to download.
```

Effect reference paintings

These are style targets for the game's lighting and water. Use the attached images for style.

R1 **Sunlight on fur and stone** Image · 2048 × 1536

```
Using the style of the attached images, paint a close-up of sunlight falling through oak leaves onto a dog's curly fur and a limestone rock, showing the brush strokes clearly.
```

R2 **Creek water** Image · 2048 × 1536

```
Using the style of the attached images, paint a close-up of clear shallow creek water over pebbles, showing the light patterns on the bottom, foam along the shoreline, and star-shaped sun sparkles on the surface.
```

R3 **Golden-hour trail** Image · 2048 × 1536

```
Using the style of the attached images, paint a wide view of a Hill Country trail at golden hour with soft haze in the distance and visible light rays through the trees.
```

Suggested order

D1 and D1-F, then P1, then S1. Then T1–T6, then the other dogs, then the remaining props, and the R items last.
